# N95 Respirator

Light weight, disposable particulate mask respirator. These respirators meet the requirements of EN149:2001 category FFP2 which protects the wearer from low-to-average toxicity solid and liquid aerosols

FFP2 & N95 are both recommended by World Health Organisation to help reduce the spread of the Corona-virus Flu Virus.

## Product Details

Non-woven fabric  
Cotton filter  
0.3  $\mu\text{m}$  Particulate matter  
NANO FIBER PROTECTION CORE PATENT TECHNOLOGY

FOUR-LAYER PROTECTION  
Spunbonded Protective Layer:  
Prevent vapor infiltration

Melt-blown Static Cotton:  
Prevent particles effectively

Nano-fiber Membrane:  
New nanotechnology can be used repeatedly

Spunbonded Supporting Layer: Absorbs sweat, oil and makes it more comfortable for skin.

Comply with SGS Standard Certification  
ISO Quality System Certification

# KN95 Respirator

The KN95 mask isolates smaller particles and fits tighter to the face reducing the amount of air released from the edges of the mask. The filtration efficiency of particulate matter can reach up to 95% under normal conditions. This mask keeps you safe from viruses, fog, smog, dust, germs, bacteria air pollution and allergens. The high quality filter with advanced static-charged microfibers helps to ease exhalation and inhalation, generally enhancing the comfort for the wearer. A two-head strap design with a two-point attachment helps provide a secure fit. Adjustable nose clips and comfortable foam reduce fogging and provide a more customizable fit. The lightweight construction improves comfort during use over longer periods of use.

## Product Details

**Standard:** GB/T 13773.2-2008, GB/T 32610-2016
